

MINI PLANKTON BANQUET®

EACH TIME RELEASE FEEDING BLOCK LASTS THREE TO FOUR DAYS.

INSTRUCTIONS:

Place the time release food block in your aquarium. Multiple food blocks can be positioned across aquarium floor to allow for territorially aggressive fish. One **Mini Plankton Banquet®** food block will feed approximately 15-20 average sized aquarium fish for 3-4 days (Ask your dealer about **Giant Plankton Banquet®** and **Regular Plankton Banquet®** for longer automatic feeding period needs). Do not use this product in fish bowls or aquariums which do not have aeration or filtration. **Mini Plankton Banquet®** will not cloud water.

APPLICATIONS:

Mini Plankton Banquet® is formulated for both **Fresh** and **Saltwater** fish. In addition to weekend and vacation feeding, **Mini Plankton Banquet®** is very useful as a daily feeder for problem eaters such as Plecostomus, Algae Eaters, Redtail Sharks, Black Sharks, Gouramis, Saltwater Tangs, Angels and Damsels. It is also very useful for small fry which do best when constantly feeding.

IMPORTANT:

The blue color in this block is pure spirulina. Spirulina is a blue green plant plankton rich in raw protein and major vitamins. Research has shown that fresh and saltwater fish exhibit superior growth, maturity, energetic behavior and more elegant coloring when fed spirulina.

GUARANTEED ANALYSIS:

Crude Protein (min)...2.5%; Crude Fat (min)...0.25%; Crude Fiber (max)...1.5%;
Moisture (max)...18.0%
