Conversion and Feeding Instructions: When introducing a new food, begin with a mixture of "old and new" food, gradually increasing the amount of new food over a 7 to 10 day period. This will prevent digestive upset as well as allow your pet to adjust to the new food. Adjust portions for proper weight maintenance and when feeding additional pets. Discard any uneaten food and clean dish before each feeding.

Daily Feeding Amount:

Young Ferret (6 to 11 weeks) 1/2 cup to 1 cup
(Approximately 60 g to 120 g)

Softened dry food with warm water to encourage eating for younger ferrets. Replace or remove remaining softened food after 2 to 4 hours. Keep dry food available during this period of the animal's life to aid in converting to the dry only diet, at around age 12 weeks.

Adolescent and Adult Ferret
(12 weeks & older) 1/2 cup to 1 cup
(Approximately 60 g to 120 g)

Allergen information: Manufactured in a facility that processes peanuts and tree nuts.

Not intended for human consumption.

Storage Instructions: A naturally preserved product needs special attention to maintain maximum freshness. After opening bag, remove air and reseal tightly. Use the food within 30 to 45 days. Store in a cool, dry location. Refrigerate or freeze for extended storage.

Satisfaction Guarantee: If you are not completely satisfied, simply return the unused portion with cash register receipt to:
