

Tracksless LITTER PEARLS™

ODOR ABSORBENT CRYSTALS
America's Original Crystal Cat Litter.

One Bag ● One Cat ● One Month™

Superior Odor Control

Litter Pearls® Eliminates Odors from Urine & Feces

The microscopic channels in Tracksless™ Litter Pearls® lock in urine and in a few minutes allow the moisture, without the odor, to evaporate so the Litter Pearls® are ready to absorb urine again and again for up to a month. Multiple cats using the litter box will shorten the days the litter provides effective odor control. Litter Pearls dries feces which eliminates odors and makes scooping easier.

Every 3.5 lbs. of Tracksless™ Litter Pearls® provides the equivalent of 28 lbs. of scoopable litter or 40 lbs. of traditional clay litter.

1. FILL
Every month fill your cat's clean litter box with 1.5-2 inches of Litter Pearls (approximately 3.5 lbs to fill an average litter box).

2. MAINTAIN
Remove and dispose of solid waste daily. Rake the Litter Pearls® so they are properly aerated and evenly distributed. See instructional video at www.ultrapet.com.

3. MONITOR
Replace Litter Pearls® when they no longer control urine odor. Clean litter box and refill.

Safe for Cats & People

Litter Pearls® contain no crystalline silica so they are safe to use in your cat's litter box and in your home.

Most cats like the texture of Litter Pearls® but when starting a new type of litter it is helpful for acceptance to pour some of the previous litter on top for the first few days.

To reduce tracking litter outside the box, we recommend a piece of carpet or a litter mat be placed at the litter box exit.

Encouraging your cat to use an indoor litter box, or properly disposing of outdoor feces, is beneficial to overall water quality. Please do not flush cat feces in toilets or dispose of outdoors in gutters or storm drains. Do not dispose of entire litter box contents through the toilet or septic systems, as it will clog pipes.

Note: Keep away from children. Pregnant women and immunosuppressed persons should remember that cat feces can sometimes transmit a disease called Toxoplasmosis. Always wash your hands after handling used cat litter.
