AMDR0
QUICK KILL™

Mosquito Pellets

STORAGE AND DISPOSAL: Do not contaminate water, food or feed by storage or disposal. **Pesticide storage:** Store closed containers of this product in a cool dry place. **Pesticide container disposal:** Nonrefillable container: Do not reuse or refill this container. **If Empty:** Place in trash or offer for recycling if available. **If Partially Filled:** Call your local solid waste agency for disposal instructions. Never reuse unused product down any indoor or outdoor drain.

WARNING AND CONDITIONS OF SALE: Sifter makes no warranty, expressed or implied, concerning the use and handling of this product other than indicated on the label. Buyer assumes all risk of use and handling of the material when such use and handling are contrary to label instructions.

TREATMENT AREAS:
• Birdbaths • Ornamental Fountains
• Dog Pools • Ram Baths • Abandoned Swimming Pools
• Flower Pots • Contaminated Water Containers • Food Dishes • Animal Welfare Trays
• Lemniscs • Water features such as fountains • Ornamental and garden ponds and fishponds • Latraces ponds

APPLICATION SITES:
This product may be applied as directed above to temporary and permanent sites which support mosquito larval development. Examples of such sites include: tree holes, animal watering troughs, water gardens, ornamental, landscape and garden ponds, farm ponds, fish ponds, and other manmade water-holding depressions.
Mosquitoes are not only a nuisance; they can transmit diseases that are a serious health threat to people and pets. While just one bite, mosquitoes can transmit West Nile Virus and other viruses that cause encephalitis. They can also transmit heartworm disease to dogs and cats.
This product kills developing mosquitoes before they become breeding, biting adults. It is easy to use, simply measure, then sprinkle the granules in areas where mosquitoes may breed (looking to mix or spray). This product offers long-lasting mosquito control for up to 30 days. When used as directed, this product will not adversely affect humans, animals, fish, or vegetation.

Do not use food utensils such as tablespoons or measuring cups for food purposes after use with insecticides.

30 DAY PROTECTION		Treatment Volume In Gallons of Water (approximate)
1 tsp.	50 sq. ft.	600
1/2 tsp.	75 sq. ft.	300
1 tsp.	50 sq. ft.	200
1/2 tsp.	75 sq. ft.	100
1/4 tsp.	150 sq. ft.	50
80 granules	1/4 sq. ft.	1

APPLICATION RATES:

Amount of Product	Treatment Area (Surface area, less than 2 ft. deep of water)	Treatment Volume In Gallons of Water (approximate)
1 tsp.	50 sq. ft.	600
1/2 tsp.	75 sq. ft.	300
1 tsp.	50 sq. ft.	200
1/2 tsp.	75 sq. ft.	100
1/4 tsp.	150 sq. ft.	50
80 granules	1/4 sq. ft.	1

NOTE: S-Methoprene larval growth regulator has no effect on mosquitoes which have already reached the pupal or adult stage prior to treatment.

PREVENTS ADULT MOSQUITOES THAT MAY TRANSMIT DISEASES BY KILLING LARVAE
West Nile Virus, Zika, dengue, chikungunya and other mosquito-borne diseases

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS - CAUTION:
Causes moderate eye irritation. Harmful if absorbed through skin. Avoid contact with eyes or skin. Due to the size and absorbency of the granule, use protective eyewear and clothing to minimize exposure during application. Wash thoroughly with soap and water after handling.

FIRST AID
If in eyes:
• Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
If on clothing or
clothing:
• Place all contaminated clothing and shoes in a plastic bag with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-256-0761 for emergency medical treatment information.

ENVIRONMENTAL HAZARDS
Do not apply to waters that drain into public waterways.

DIRECTIONS FOR USE:
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. **GENERAL DIRECTIONS:** This product contains (S)-Methoprene, insect growth regulator which controls mosquitoes before they can become adults (or up to 30 days after application). Measure and then sprinkle the appropriate amount of this product evenly over the surface of the water to be treated in order to control mosquitoes before they become breeding, biting adults. Measure the surface area of the water and follow the label below for the appropriate amount of product to use. Emptying or draining small containers that are holding water will ensure the best results. In instances where small containers cannot be emptied or discarded and for locations such as flower pots, old tires, urns, etc. use approximately 80 granules for every gallon of water.

Begin treating when adult mosquitoes are first noticed in the spring and continue applications throughout the mosquito season, which is typically up to the first frost. After treatment, you may notice that there will still be larvae in the water. Treated larvae will continue to develop normally to the pupal stage where they die.
**Use in New York is only in contained sites that do not runoff to public waters.
