

WATER ROUNDS

More Growth • Less Water

Non-Eroding Watering Basin

Water. It is our single most valuable natural resource. Landscaping accounts for 50% of residential water usage and a significant amount of that water never makes it to the plants and trees that need it most. Wasteful water runoff, hillside erosion and surface evaporation contribute to the growing problem.

Enter Planting Rings

Planting Rings make watering Quick, Easy and Effective.

QUICK

The non-eroding watering basin allows water to slowly penetrate the soil. Plants and trees can be watered quickly with no dirt berm erosion, or wasteful runoff using a household garden hose. The 16" Ring holds 2 gallons of water. The 20" Ring holds 3½ gallons of water. And the 24" Ring holds 5 gallons of water.

EASY

The unique design of this non-eroding watering basin makes it simple to install. The durable teeth cut easily into the soil and the tapered sidewall and interior V-Groove keep the basin securely in place.

EFFECTIVE

The non-eroding watering basin allows water to slowly penetrate the soil three inches deep before flowing horizontally to the plant's drip line. Because water no longer travels along the surface, evaporation is drastically reduced and valuable water is saved. Not only do Planting Rings produce healthier, larger trees, shrubs, bushes, and vegetables, they also prevent invasive weed growth and beautify any garden or lawn as an attractive landscape border.

Planting Rings

Makes Watering Quick • Easy • Effective

Live goods thrive with Planting Rings. Beautify gardens and make watering Quick, Easy and Effective with attractive, durable, easy-to-install, water retaining Planting Rings. Our Planting Rings are perfect for the gardener who wants a no fuss round border.

Features and Benefits

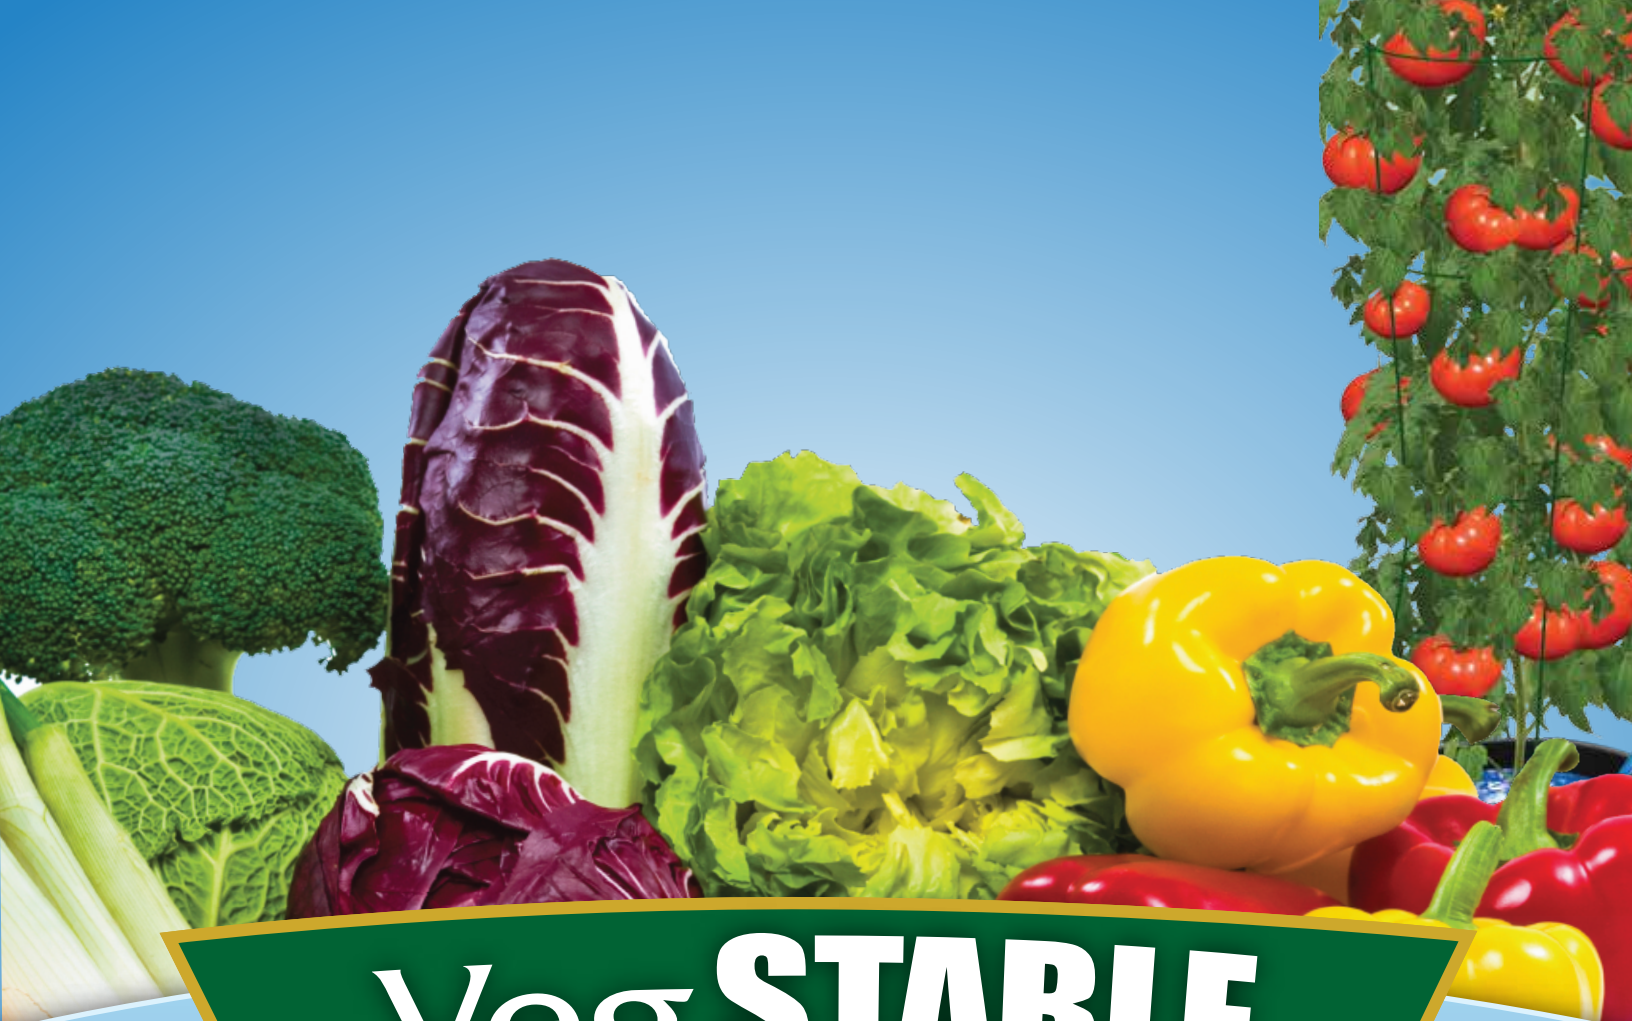

- Ideal for trees, shrubs, flowers, vegetables, and herbs.
- Replaces dirt berms for deep, effective watering.
- Maximizes water usage.
- Promotes larger, healthier, plants and root systems.
- Saves water by eliminating wasteful runoff.
- Prevents hillside erosion.
- Limits invasive weed growth.
- Easy to install.

The 24" Planting Ring opens and closes for easy installation around existing trees and bushes. The five gallon basin makes watering new trees quick, easy and effective. The 24" Planting Ring can be removed once a newly planted tree is thriving or left in place as a defining landscape border.

**The 16" and 20" rings are solid*

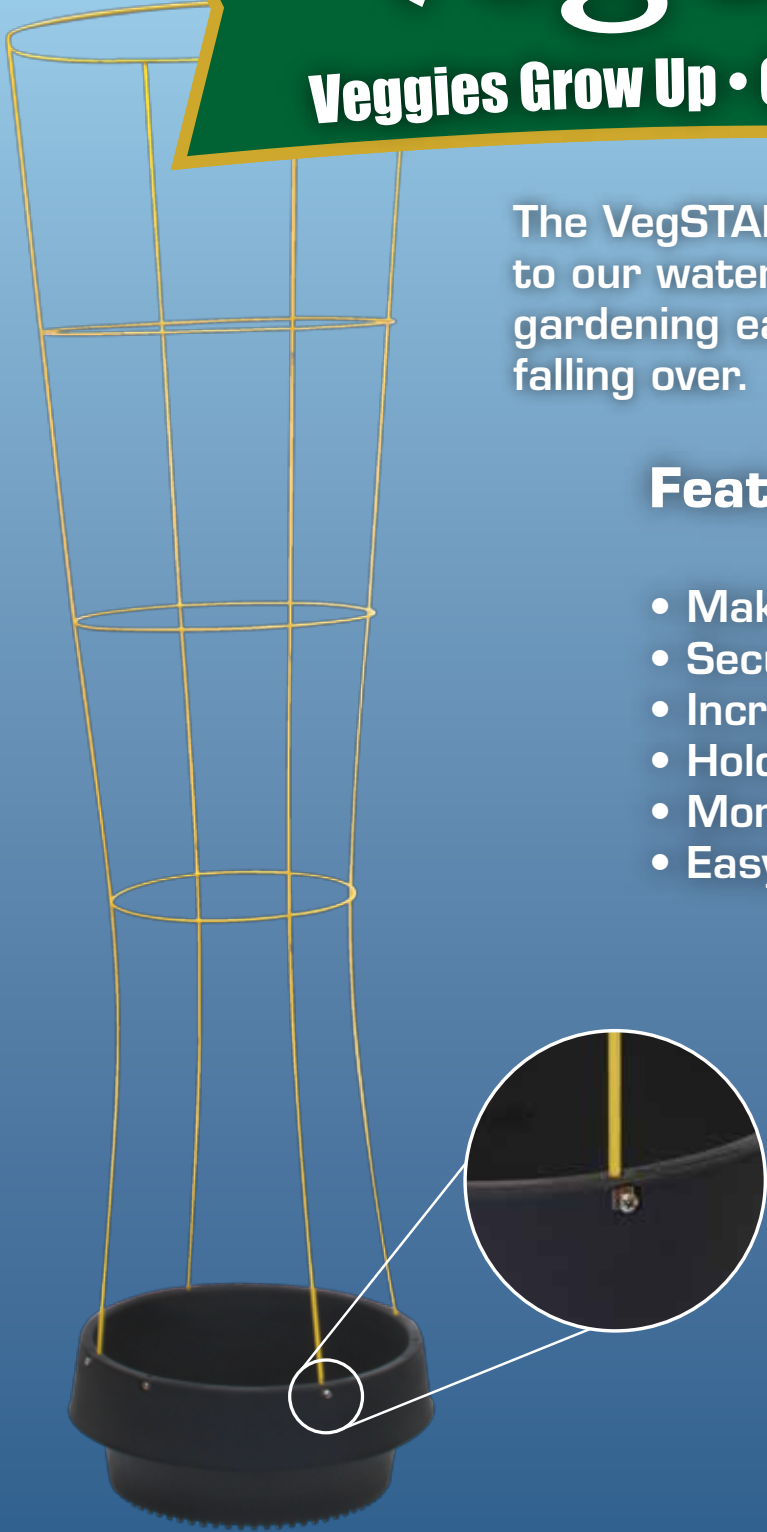

VegSTABLE

Veggies Grow Up • Cages Won't Fall Over

The VegSTABLE securely anchors tomato cages to our water retaining rings to make vertical gardening easy. Vegetables grow up without falling over.

Features and Benefits

- Makes vertical gardening easy
- Securely anchors cages
- Increases cage height 6" - 8"
- Holds 2 Gallons of water
- More Growth • Less Water
- Easy to install
