

Sav-A-Chick® Probiotic Supplement

Poultry supplement for use in drinking water. Contains a source of live (viable) naturally occurring micro-organisms. Use alone or with Sav-A-Chick® Electrolyte. Use for birds newly arrived, during periods of stress, and after antibiotic treatment.

FEATURES AND BENEFITS

- Designed specifically for small backyard flocks
- Each convenient, pre-measured packet mixes into one gallon of drinking water
- Formulated specifically for poultry: chickens, ducks, turkeys, and other domestic poultry and waterfowl
- Suitable for chicks and adult birds
- Promotes digestive health by supporting a more diverse population of beneficial bacteria in the digestive tract
- Retail unit is a 3-strip of 0.17 oz packets, packed 20 3-strips in a pop-up display carton (3 display cartons per master carton)

DIRECTIONS FOR USE

Mix a single packet (approx. 0.17 ounces of powder) into one gallon of clean, cool water. Offer the mixed solution to birds newly arrived, during periods of stress, and after antibiotic treatment. If using with Sav-A-Chick Electrolyte, mix one packet of each product into the same gallon of water. Offer the mixed solution AND plain drinking water in a separate container. **Important:** Make fresh solution daily.

Please reference product code 01-7403-0203 when ordering.
