

EM•1® Microbial Inoculant is a naturally fermented live microbial product. EM•1® is a safe alternative to synthetic chemicals that can be used for agriculture, aquaculture, animal husbandry, sanitation/cleaning, waste water treatment, construction, etc. EM•1® is completely non-toxic and safe for humans, animals, and the planet.

NOT A PLANT FOOD INGREDIENT

White Flakes may appear on the surface and are natural due to live cultures. Some sediment at bottom of bottle is natural.
