

EM-1[®] BOKASHI

Compost Accelerator

Ingredients: Organic Rice Bran, EM-1[®], Molasses, and EM[®] Ceramic Powder

EM-1[®] Rice Bran Bokashi is saturated with beneficial microorganisms and is commonly used for food waste recycling, and to accelerate compost and plant residue and mulch decomposition. It can also be used in potting soil mixes.

Compost and gardening directions: Sprinkle a handful of Bokashi on the food waste after it is placed in a fermentation bucket or compost pile. Fermented food waste can be buried in a hole and covered with 6 inches of dirt or layered in a compost pile to accelerate decomposition. Apply Bokashi on mulch or plant residue at a rate of 1 lb. per 100 sq. ft. Add at 2% to potting soil mixtures.

Keep dry during storage. Use within one year of purchase
