

WILD BIRD FOOD & CHICKEN TREAT

Great for
Chickens
too!

Mealworms

High in Protein! Attracts Bluebirds, Cardinals,
Chickadees, Woodpeckers, Wrens, Robins & Chickens

KAYTEE® Mealworms are an excellent, high-protein food source for many wild birds and chickens. They are a high-energy treat that will attract many species of birds that are difficult to attract with traditional seed blends. In addition, they are an important source of food for baby birds.

Mealworms can be used alone in a feeder or mixed with your favorite wild bird seed.

Mealworms for chickens can be fed as a treat in addition to their daily diet.

QUALITY: Our mealworms are oven dried for the best quality and are also preservative & additive-free, ensuring a nutritious and healthy high-protein treat.

DIRECTIONS FOR WILD BIRD USE:

- Keep feeders filled with fresh food.
- Discard old food before refilling and clean feeder regularly to minimize mold and bacteria.
- Wash your hands after contact with bird food or feeders.

DIRECTIONS FOR CHICKEN USE:

- Kaytee® Mealworms can be fed to chickens as a supplement to their regular diet. Mealworms are not a complete feed and should not comprise more than 10% of the birds' diet.
- Always provide shelter and a constant supply of fresh, clean water.
- Consumption will vary depending upon season of the year, nutritional needs of the animals and availability of other foods.
- Wash your hands after contact with bird food or feeders.
