30 SECONDS[®] SPRAY & WALK AWAY[™]

The Original Since 1977

**LICHEN, MOSS, MOLD
& ALGAE KILLER**

CLEANS: Roofs • Composite • Glazed Tile • Shingles • Pathways • Sealed Brickwork • Sealed Concrete • Asphalt Driveways • Vinyl & Aluminum Siding • Wood Decks • and more

30 SECONDS SPRAY & WALK AWAY is specifically formulated to kill Lichen, Moss, Mold & Algae on roofs & other exterior surfaces outdoors.

DIRECTIONS:

It is a violation of Federal law to use this product in a manner inconsistent with its label. Read all Directions and Precautionary Statements before use. Shake contents before use. Mix one part of **30 SECONDS SPRAY & WALK AWAY** to five parts water (1:5 mix ratio). 1 gallon makes 6 gallons of Ready To Use product and treats 750-2250 sq. ft., depending on the growth and porosity of the surface. Use a backpack or pump up tank sprayer to apply. Spray surface to be treated when surface is DRY and rain is not predicted for 12 hours or longer. Thoroughly saturate surfaces to be treated. To maximize coverage, remove excessive organic growth or clumps where possible, prior to applying **SPRAY & WALK AWAY**. This will save you money and increase the effectiveness of the product. Once treated, the surface requires no pressure washing, scrubbing or rinsing. Just thoroughly WET the surface and **WALK AWAY**. Treated surfaces will show signs of decay over coming weeks and growth will erode away with the weather. Alternatively leave treated surface for a few days after treatment, then brush off decaying growth with a stiff brush. After use clean and flush applicator thoroughly with water. If you prefer immediate results, we recommend **30 SECONDS OUTDOOR CLEANER**.

HELPFUL HINTS & PRECAUTIONS:

Staining on hard surfaces can occur, so always test on a small, inconspicuous area first. **30 SECONDS SPRAY & WALK AWAY** is best applied in overcast, dry conditions to avoid rapid evaporation. **DO NOT** allow spray to come into contact or drift onto plants or trees. **DO NOT** allow pets to walk on treated areas until surface has dried. If contamination does occur, rinse animals paws with fresh water to prevent animal licking **SPRAY & WALK AWAY**. **DO NOT** allow product to enter lakes or streams or enter storm water drainage systems. **DO NOT** use on roofs where potable water is collected.

ONGOING MAINTENANCE:

30 SECONDS SPRAY & WALK AWAY does not show immediate results, but works as a treatment, killing the growth slowly and effectively over time without damaging the surface. Some Lichen & Moss may take a week to remove or show signs of decay. If the surface to be treated is not fully exposed to rainfall or is vertical, then some additional wetting of the surface may be required. Reapplication may be required where heavy growth persists. Do not repeat treatment more than (6) times per year.

ADVICE FOR SPECIFIC SURFACES

WOOD DECKS: Growth on Cedar or Redwood may require brushing for complete growth removal. Use water and a hard broom 1 month after application. Once cleaned, it may be maintained with **SPRAY & WALK AWAY** to prevent further growth or stains.

PLAY EQUIPMENT: Do not allow children on play equipment (i.e. slide, plastic gyms) if it has been treated with **SPRAY & WALK AWAY** until the equipment has been washed down with fresh water, at least 24 hours after application.
